

State of Alaska
Department of Fish and Game
Nomination for Waters
Important to Anadromous Fish

Region **SOUTHEAST** 

USGS Quad **Bering Glacier A-4**

Anadromous Water Catalog Number of Waterway **191-10-11470-2006; 2006-3020; 3026;**

Name of Waterway **Swamp Creek** ☐ USGS Name **3030; 3034; 3038; 3044** ☒ Local Name

☒ Addition ☐ Deletion ☐ Correction ☐ Backup Information

For Office Use

Nomination # 98 168	<i>Jana Sanders</i> Regional Supervisor OK	10-31-97 Date
Revision Year: _____	<i>Ed Wain</i> AWC Project Biologist	3/4/98 Date
Revision to: Atlas _____ Catalog _____	<i>2. Irone</i> Drafted	3/10/98 Date
Both X		
Revision Code: A-2 E-9		

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho Salmon	6/17/97		100+		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Swamp Creek has a fish barrier located 840' downstream from the 1000 ML road right-of-way clearing. The stream reaches downstream of the barrier contain coho salmon. Swamp Creek borders Unit 7 and Unit 6 of the Gulf Coast timber sale and is generally 12' wide and 7" deep. A high-energy deposition area of material is located upstream of the barrier for 300'. We located 7 tribs off of Swamp Creek which all contained coho salmon fry. The extent of these tributaries will require further survey work. The main channel of Swamp Creek flows into the Coho Polygon, which flows into the main channels of Mink Creek.
